Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 April 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoffend (5,872,447).

1. As to claims 1 and 2, Hoffend discloses an anchor bracket comprising a rear wall (18), a front wall (16), a top wall (20), a clamping means (22,24) and at least one attach point () located on the front wall and extending outward therefrom in a direction away from the back wall wherein the clamping means comprises an internally threaded hole and a threaded shaft capable of clamping the anchor bracket to a lip of a swimming pool (see Fig. 4 & Col. 1, lines 66+ and Col. 2, lines 41-44).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hoffend (5,872,447).

2. As to claim 3, Hoffend discloses an anchor bracket as described above (see discussion of claim 2). Hoffend further discloses that the shaft includes a handle (enlarged portion of screw) but not a base as substantially claimed (see fig. 4). The examiner takes Official notice that the prior art includes clamps having threaded shafts with bases that are rotationally displaced relative to the shafts. At the time of the invention, it would have been obvious to a person of ordinary skill in the art to add such bases to Hoffend's threaded shaft to protect the pool edge while providing the anchor with a secure fit.

Response to Arguments

3. Applicant's arguments filed April 19, 2004 have been fully considered but they are not persuasive.

Regarding claims 1-3, every element and limitation of the claimed invention is present within the prior art. Applicant has indicated that the prior art discloses a "bottom wall" that fits under an over hanging lip of an above-ground pool as shown in Hoffend's Fig. 7. The label of the wall as being a "top wall" or a "bottom wall" is irrelevant because that particular description depends on the orientation of the overall anchor bracket. The bracket can be use in either orientation as an anchor for attaching a swimming device.

Allowable Subject Matter

4. Claims 4-7 are allowed.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3764

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
